Deerfield Beach, Fl. 33442

April 24, 2008

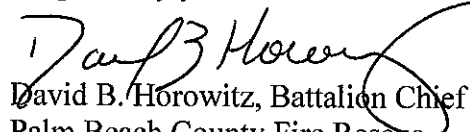

I would like to take the opportunity to thank you and Medics Ambulance Service for assisting us at the airport's triennial drill. The drill is a FAA requirement for certification of the airport.

The use of the three ambulances, crew members and supervisors afforded us to provide a more thorough implementation of Palm Beach International Airport's emergency response plan and Palm Beach County Fire Rescue MCI protocol.

Along with your agency we had the Airport Executive Staff, Sheriffs Office, Health Department and Medical Examiners Office. Included were federal agencies, the FBI, TSA, FAA, and Department of Homeland Security just to name a few as active participants at the drill. Also included were Airline representatives, Department of Airport's staff and communication center.

Opportunities such as these to exercise procedures and operational guidelines provides experience through training. Additionally these drills allow members of the different agencies to interact with actual resources and procedures. Your personnel that were in attendance were courteous, helpful and appreciated.

Respectfully yours

David B. Horowitz, Battalion Chief
Palm Beach County Fire Rescue
Aviation Division
Palm Beach International Airport
